## EDUCATION

Ph.D. School of Computing, National University of Singapore, 2019-  
B.Tech. Computer Science and Engineering, IIT - Guwahati, 2014-2018

## RESEARCH INTEREST

My research interests are distribution testing and formal methods. Specifically, I want to explore and apply the theory of distribution testing to build faster verification tools for real-world distributions, such as samplers and generative models. More generally, I am interested in the use of formal methods (like combinatorial solving) in machine learning.
